

ASHRAE Region X Chapters Regional Conference August 7, 8 and 9, 2014

By: Joseph K. Ting,
P.E., P.Eng. General Chairman

The Chapter Regional Conference (CRC) is intended to provide a forum for the dissemination of information pertaining to chapter and regional activities of ASHRAE. In August of 2014, it is the turn of the ASHRAE Hawaii Chapter to host this event for the fourteen (14) chapters within Region X, which encompasses the four States (Arizona, California, Hawaii and Nevada) at Ala Moana Hotel in Honolulu.

The medium is provided as follows:

- Chapters to report their activities for the previous year and establish goals for the coming year.
- Regional officers to report their activities and plans.
- Society officers to inform the region of Society plans, review chapter activities within the region and participate in workshops.
- Chapter delegates to submit motions for proper review
- Chapter delegates to present nominees for Society and regional officers and candidates for honors and awards
- Conducting chapter workshops that will educate and prepare officers and committee members to fulfill their responsibilities
- Conducting technical sessions on subjects that will educate as well as increase attendance
- Organizing social activities that will increase attendance and promote camaraderie
- Recognizing and presenting awards to chapter and regional members.

KNOW YOUR ASCE HISTORY

by C.S. Papacostas

Cyclomere Park

On the occasion of the establishment of League of American Wheelmen (L.A.W.) on May 31, 1880 at Newport, Rhode Island, the New York Sun [6/1/1880] had declared, "the growth of bicyclism has been very rapid of late in this country, and amid all the talk of new motors, it is fair to say that the bicycle is the one modern machine which has come nearest to solving the problem of personal rapid transit." That was, of course, before the proliferation of the private automobile that claims that distinction to this day.

In 1894, the national L.A.W. banned all but whites from membership. Consistently with the social mores of the day, it had also been advocating for the abolition of bicycle racing by women. As the Hawaiian Star [HS 8/14/1896] rationalized, "it is presumably for excellent reason that the Racing Board of the L.A.W. has announced that it will blacklist any bicycle track upon which female riders are allowed to contest before the public" and, in a widely reprinted article originating with the New York Sun, "Racing among women ought to be abolished... Moderate wheeling invigorates the system, strengthens the muscles and increases physical endurance, but excessive wheeling is positively injurious and shockingly unwomanly [e.g., HS 9/5/1896]."

Other racing restrictions reported in the press included "the railroad's track at Santa Monica is blacklisted for allowing Sunday racing [San Francisco Call 12/12/1896]."

So called Sabbath, Blue or Sunday Laws have a long history. They were even encoded in the Hawaiian Laws accompanying the Constitution of 1840 and prohibited "all unnecessary worldly business" as well as "all worldly amusements and recreations" and also "all loud noise, and all wild running about of children" on Sunday. When the Pacific Commercial Advertiser (PCA) advocated for the relaxation of Hawai'i's Sabbath laws to allow ships to coal, discharge or take freight on Sunday, the Hawaiian Gazette (HG) of May 13, 1874 retorted: "It is enough to say that Christian principles require the day to be set apart from ordinary business." The debate continued unabated and in 1898 the Independent [2/2/1898] editorialized, "We hope that one of the first measures taken up by the Legislature will be the repeal of or at least a radical amendment to the present Sunday Laws."

It was within this social milieu that C. S. Desky pitched his idea to Honolulu's white male bicycle riders on Sept. 30, 1896. As I talked about last month (June 2014), Desky's idea for a bicycle track around a drainage pond, named Cyclomere Lake, in the Kewalo tract subdivision of Honolulu was gaining traction, so to speak, toward the end of 1896.

In response to these proposals, annexationist Lorrin A. Thurston put together a committee to negotiate with Desky for the track, a rough description of which appeared in the Hawaiian Star (HS) of Jan. 7, 1897: The plans called for a track, grand stand and club house, and a small island covered with plants, flowers and greens and featuring the highest flagstaff in Honolulu was to occupy the center of the 5-acre oval pond. The Thurston committee presented their findings at a meeting on Jan. 27 where he was elected Chairman of the Kewalo Basin Track Association and a five-member organizing committee was put together over the next few days. It included A. B. Wood, the

president of the YMCA, and W. W. Harris, the president of the Honolulu Road Club. The committee met with surveyor W. A. Wall to discuss the project and agreed the "Kewalo soil will make excellent topping for the track. The soil packs well and is hard as cement when rolled [HS 2/11/1897]."

By Feb. 23, the editors of HG became impatient at the lack of apparent progress: "The time for closing with Mr. Desky on his proposition has passed by long ago," they warned. On the 26th, the HS announced a change in committee membership, including a new Chairman, W. F. Allen, and an estimated cost of track, grand stand and other buildings of \$10,000. On his side, Desky was reported to be "anxious over the proposition. He vows that unless the wheelmen do something shortly, he will go ahead himself and build the track [HS 2/16/1897]." Fund raising was not as easy as expected and "enterprise falls through for lack of funds," declared a headline [HS 3/13/1897].

Interestingly, at that point the Honolulu Road Club made an independent offer to Desky asking him to build the track and lease it to them for a brief period. Desky determined that this offer did not make business sense for him, and refused.

A month later, a group of investors led by Henry E. Walker of the Cleveland bicycle agency announced a scheme to build a one-sixth mile wooden track somewhere in "Upper Beretania." It would be "15 feet wide with the exception of the home stretch, which will be 20 feet. It will be banked on the turns to the height of 6 feet and on the straights from 1.5 to 2 feet [HG 4/23/1897]."

Desky proceeded to negotiate with both competing groups and finally reached an agreement with the Walker association for a rental of a board track, grand stand and other buildings at a yearly amount of \$200 on a tract of land at Kewalo separate from Cyclomere Lake that would feature night racing by electric light, a relatively new technology. The boards lining the track were to be "battens, one inch thick, three inches wide and twenty feet long [HS 5/29/1897]." Curiously, only a month later, Desky and Walker arrived at an agreement to disband the Bicycle Track Association and to "build the track as a private enterprise" on 4-acre tract on the Waikiki side of Cyclomere [HS 6/26/1897]. The specifications for this one-sixth mile facility included a wooden track, 18 feet in width with a 23-foot stretch, outer edge 6 feet higher than inside edge, grand stand with 500 seats and private boxes as well as dressing rooms and training quarters underneath. Although contractor Chas. D. Walker was selected for the job, these plans also fell through for Desky ended up building the track on his own as originally envisioned, around the lake, featuring a clay soil surface, 25 foot wide with 40-foot home stretch, a grand stand for 800 people, and "powerful electric lights" to be spaced 100 feet apart [HG 7/27/1897]. Contractor W. H. Cummings replaced Charles Walker and W. A. Wall surveyed the now shortened to one-third mile track. The course was banked on the backstretch "2 feet in 25, just enough for drainage, while at the other turn just before entering the home stretch [was] 6 feet in 25, much less than some tracks in U.S. [EB 8/4/1897]." The surface treatment was described as "natural cement taken from the bottom of the lake... This cement is nothing but decomposed coral and it is thought to be superior to the manufactured cement of which many Eastern tracks are composed."

An advertisement by Tribune Bicycles in several papers referred to the Kewalo Bicycle Track as Cyclomere Park and soon thereafter "Desky appointed C. L. Clement sole manager [HS 8/20/1897]."

The opening night was finally set for Saturday, October 23, 1897.

On June 18th, The CMAA Hawaii Chapter held a Happy Hour at Café Ole on Maui to network with and meet and greet with the construction professionals on the Valley Isle. This event kicked off chapter activities on the outer islands.

On June 26st, The CMAA Hawaii Chapter once again welcomed the Hawaii Chapter of American Association of Cost Engineering (AACE) to join us at our quarterly happy hour at Bar 35. The networking and socializing at the chapter happy hour events seem a popular activity for our membership.

Upcoming events for the summer include:

- July 16th will be the chapter's next luncheon meeting at Hale Ikena. Information will be coming out soon.
- Also, watch for invitations to several chapter community service activities in the near future.
- The Professional Construction Management Class is coming to Honolulu again this fall on August 11-13.

If you have any questions, would like to get involved with the CMAA Hawaii Chapter or simply be added to our email list, please contact one of our board members or email us at Hawaii.cmaa@gmail.com

Next Section Meeting

The next ITE Hawaii Section meeting will be the Annual Section Meeting, held on July 30th, 2014. Please RSVP to ite.hawaii.section@gmail.com.

Section Meeting Summary

On Wednesday, May 28, 2014, ITE Hawaii held its monthly meeting at the Fasi Municipal Building. President Packard opened the meeting stating that all members should have gotten their Western District ballots, if not please let her know.

Director Yoshida announced the candidates for the Hawaii Section: Pete Pascua, Natasha Soriana, Sara Toyama, and Robert Nehmad, for President, VP, Secretary, and Treasurer, respectively.

VP Gibson introduced guest speakers Cyndy Aylett and James Matsuzaki from the City and County of Honolulu, to talk about the City's Pavement Management System (PMS). Cyndy Aylett, from the Department of Facility Maintenance presented a PowerPoint presentation about the PMS. She explained that the City was awarded a grant from the Oahu Metropolitan Planning Organization, and started the project in October 2012, to develop and implement the system that will program the money to be most effective. The City chose the MicroPAVER management system used by the US Army Corps of Engineers and earthmine images as the measurement technology which can be used by other departments as well. Cyndy explained that the Pavement Condition Index is determined by distress type, quality,

and severity. She went over the factors impacting degradation and the different types of preservation treatments. James helped answer questions about the GIS aspects, and the presentation concluded with picture examples of the different PCI categories.
